

iLearn Math is the internet-delivered software from iLearn that manages the entire math intervention process. In brief, it **assesses, prescribes, instructs** and **reports**. The bottom line: It delivers results in math.

iLearn Math provides you with a curriculum built from state standards. It delivers an individualized program to each student in a class at the same time, regardless of their abilities. It uses technology in an innovative way that makes it much easier to deliver truly differentiated instruction to each student. Here's how:

- 1 Every student is fully assessed to identify specific learning "gaps" and placed on a course that ensures all "gaps" are filled before the student can advance.
- 2 **iLearn Math** delivers the curriculum and gives the student just the right amount of instruction and practice necessary to understand and retain the concepts being taught. Students cannot proceed without mastering the material at each level.
- 3 The **iLearn** management system keeps track of the results and reports them to the teacher on demand.

It's the closest you can come to a highly-skilled tutor for each student.

"We saw gains up to two and three grade levels per year." - Andre Touchard, Principal

What's different?

iLearn Math

- Requires true mastery. Students can't guess their way through the program, since it's not based on a multiple-choice format and they must generate their own answers.
- Actually delivers real instruction using engaging graphic animation and natural voice narration
- Is not based on cartoons or a game format; it's real education.
- Greatly reduces teacher workload by automating time-consuming tasks, such as planning lessons, writing tests or grading papers, which frees up the teacher to work one-on-one with students.
- Improves student morale, which results in fewer student behavior problems.
- Motivates students by allowing them to see success every day, regardless of their abilities.

The bottom line? iLearn Math delivers results: Accelerated achievement gains for all students.

Your subscription to iLearn Math includes unlimited, free technical support and 24/7 access to data.

"This user friendly program has allowed students to excel where traditional methods have failed. The interactive technology will not allow students to 'cheat' to move beyond their ability. Teachers are able to monitor students' progress as they move through the program."

- Mary Beth Waller, Teacher

Your students will enjoy doing math...and seeing success every day.
